Shayan Sadigh

Location: California, United States
Email: ssadigh.contact@gmail.com
Github: https://github.com/shayanpersonal (150+ stars)

Summary

- Ex-Amazon ML/AI software engineer. Worked on SageMaker.
- Placed 10th in $1.5 million Kaggle competition - designed custom MVCNN-RNN neural net (Github link)
- Proposed new deep learning layer - "checkered subsampling" (arXiv paper)

Work Experience

Santa Barbara City College
Adjunct Professor (Aug 2023 - Dec 2023)

- Leading students through training deep learning models. Teaching CS114: Intermediate Python.
- SBCC is frequently ranked among the top five city colleges in the country.

moebot.ai
Founder (Jan 2023 - Oct 2023)

- Built GPT-4 based AI agent for Discord servers. Makes discrete decisions such as choosing whether to respond and whether to send emoji reactions via prompt engineering.
- Backed by Redis. Backend provisioned in Google Cloud. Generates revenue through Stripe transactions.

Amazon Web Services (AWS)
Software Engineer II (L5) (Mar 2020 - Dec 2020)

- Collaborated with researchers to help integrate Apache TVM deep learning compiler into Amazon SageMaker's PyTorch fork.
- Resolved versioning and compilation issues in the team's XGBoost and PyTorch forks.

Palo Alto Networks
Senior Staff Software Engineer (Oct 2019 - Mar 2020)
Staff Software Engineer (Sep 2018 - Sep 2019)

- Awards: Project of the Quarter - Machine Learning Antivirus
- Solved dozens of the team's open tickets, including feature requests and bug fixes from researchers and product managers.
- Worked under layer 7 threat detection team, who maintain the critical C codebase responsible for pattern matching and blocking threats in PAN's enterprise firewalls.
- Imported research team's XGBoost models into firewall. Proposed and implemented new pattern matching algorithms for PAN-OS, written in C.
- Brought up and helped train 2 junior developers.

Other
Spring 2018 : Teaching Assistant @ UCSB (CS176A - Intro to Computer Networks)
Summer 2017 : Software Engineer Internship @ Palo Alto Networks
Summer 2016 : Software Engineer Internship @ Thermo Fisher Scientific
2015 : Web developer @ UCSB Brain Initiative

Projects

- stacked-autoencoder-pytorch (100+ stars) - a popular PyTorch autoencoder.
- Checkered CNN (20+ stars) - my deep learning technique, checkered subsampling.
- Passenger Screening Model (20+ stars) - solution to $1.5 million passenger screening challenge.
- GauchoMap Chrome Extension - 200+ users when I was maintaining it (2016).

Education

- 5-year accelerated B.S. + M.S. program @ University of California, Santa Barbara
- Master of Computer Science (2018)
- Bachelor of Computer Science (2017)

Miscellaneous

- First-generation college graduate.
- GRE scores: 5.5 W, 166 Q, 162 V (90 - 99th percentile)
- Languages: English (native), Farsi (native, but very rusty)
- Top-30(?) Dance Dance Revolution player in California.
- 2nd-degree black belt in Soo Bahk Do.
